SECURITY AS A SERVICE

Security as a Service (SECaaS) is a comprehensive cloud security service that includes anti-virus, anti-malware, intrusion detection, authentication, security event management, and more. We can provide 24/7 protection for your apps, data, and operations running in the cloud.

DEFEND YOUR BUSINESS FROM ONLINE THREATS
REAL-TIME CLOUD SECURITY SERVICES WITH LOW TCO

Security as a Service users pay a monthly subscription to access robust and scalable security.
Your business would not need to pay upfront costs for expensive on-premise hardware and software.

SOLUTIONS AVAILABLE IN CUSTOMIZED PLAN

Perimeter Threat Protection
Real-time network monitoring, intrusion prevention, and anti-phishing solution

Endpoint Protection
Our virus protection can prevent infections from reaching PCs, servers, iOS, and Android devices

Malware Protection
Detect/remove high-risk malware that steals, corrupts, and destroys private data

Email Security
Secure your on-premise email systems by filtering spam, viruses, and malware

Email Encrypted Communication
Protect the privacy of your email communications by encrypting data from end to end

Data Encryption
Mitigate hacking risks and meet compliance requirements by encrypting data on your devices

Security Consulting
Run penetration testing, mock phishing attacks, internal reviews, and staff security training

Compliance Management
We can assist with meeting data security regulations, such as PCI, SOX, and HIPAA

WHY SWIFTTECH?

We strive not only to meet but to exceed the expectations of our customers. We believe that custom technology and creative solutions can provide the power to unlimited success. Our top priority is helping our customers achieve that success.

PROTECT YOUR INFORMATION ASSETS WITH **SECURITY AS A SERVICE**

Many business workers rely on the internet for communicating, conducting research, and monitoring events. As internet use increases, so does the risk of malware and viruses reaching the company network. The influx of new devices, mobile workers, and cloud applications increases the network attack surface area further. The dangers of compromised security include data loss, regulatory compliance violations, leaked login information, and denial of service. Take control of your IT security with SwiftTech's Security as a Service. (SECaaS).

With SwiftTech Solutions' SECaaS, we can block threats from your network 24/7 with our cloud prevention, detection, and resolution services.

NETWORK PROTECTION

We can protect your devices from the latest threats by securing the network perimeter against intrusions, viruses, spyware, worms, Trojans, adware, keyloggers, and malicious mobile code. Our service will stay up to date with the latest virus definition updates and then scan data before it enters the network.

PREDICTABLE MONTHLY COSTS

You can get the cost and flexibility benefits of the cloud by accessing our cloud security services for a monthly subscription fee. Your business will not need to make a capital investment in servers, software, data center space, and network equipment. We can take care of those services for you.

EXPERT SECURITY CONSULTING

SwiftTech Solutions will help your organization understand the threats your company faces and help mitigate them. Our expert cloud consultants will examine your day-to-day workflow and conduct a remote vulnerability and security assessment on your IT infrastructure. We'll then provide recommendations for remediation and define user policies.

DEPLOY & SCALE ON DEMAND

With our cloud security services, we can deploy protection to your users quickly and scale protection as the business grows. Also, our consolidated management model allows us to apply updates to your hardware and software remotely from our offices. Your business can experience increased IT service uptime and lessened calls to IT support.

VISIBILITY & CONTROL

SwiftTech Solutions can manage your portfolio of different vendor services with our advanced monitoring system. We'll collect data on the latest threats, then adjust our detection algorithms and alerting systems accordingly. Your business will receive weekly reports and access to a client side portal so you can view the status of your IT security.

STAY IN COMPLIANCE

SwiftTech Solutions can provide support for industry data security compliance standards, such as HIPAA, PCI, and SOX. We'll work to close compliance gaps by repairing network vulnerabilities, creating a policies and procedure document, and providing optional security awareness trainings. We can also ensure data is backed up regularly.

Our SECaaS services can provide even more benefits than those listed here. A IT assessment by a trusted SwiftTech specialist is the best way to find out if our SECaaS services are right for your business.

WHY SWIFTTECH?

We strive not only to meet but to exceed the expectations of our customers. We believe that custom technology and creative solutions can provide the power to unlimited success. Our top priority is helping our customers achieve that success.
