

GravityZone Cloud MSP Security

Unified, highly effective Next-Gen AV, EDR, Risk Analytics and Hardening

Sophisticated new ransomware attacks and data breaches easily elude most AV products, threatening service providers and customer businesses, while a continued increase in remote work significantly amplifies risks. Bitdefender GravityZone Cloud MSP Security is a unified, highly effective cybersecurity solution that prevents and detects more advanced threats than any other Next-Gen or EDR product.

Most comprehensive unified security

Security experts agree that preventive controls are not enough to stop modern attacks. However, adopting tools such as EDR or SIEM without a robust defense-in-depth foundation can rapidly increase costs with many incidents and false positives that need investigation. It can also lead to delays in stopping attacks, allowing data breaches to take place. GravityZone Cloud MSP Security leverages an extensive set of technologies, both out of the box or as optional add-ons, as well as machine learning and behavioural analysis to provide advanced attack protection.

At-a-Glance

Designed specifically for Cloud and Managed Service Providers, Bitdefender GravityZone Cloud MSP Security minimizes security and operational overhead and maximizes profits with a single platform to manage security and provisioning for all customers with monthly usage-based licensing.

Why we choose Bitdefender

MOST EFFECTIVE AI-BASED CYBERSECURITY

Thanks to 30+ technology layers and more mature AI, perfected since 2008, Bitdefender routinely ranks 1st for prevention and detection in independent AV & EDR tests.

END-TO-END UNIFIED SECURITY

A single MSP platform, with extensive APIs and more RMM integrations than any other security vendor, automates tasks and reduces costs.

MAXIMIZED REMOTE WORK

PROTECTION AND PROFITS

Bitdefender includes extra risk analytics, Firewall, IDS, content and device control and optional advanced security add-ons with flexible licensing, helping MSPs maximize WFH protection and profits.

“The product works, it does what it’s supposed to do, and the support is excellent. We’ve re-evaluated it again, there’s nothing out there that really can compete.”

Will McKillop, Director of Field Service, Pinnacle Hospitality Systems

Build advanced security on a proven, best-practice foundation

Bitdefender adopts a best-practice approach using four comprehensive security layers that automatically block even advanced threats at pre-execution, drastically reducing manual detection and response efforts:

Hardening and Risk Analytics CORE

Risk Analytics

Find and fix vulnerabilities, track & improve risk scores

Web Threat Protection

Behavioral traffic scan, Anti-phishing, Search Advisor

Content Control

Restrict user access to applications, sites, or web categories

Device Control

Control access and use of external devices

ADD-ON

Patch Management

Flexible, fast Patching for Win OS and 3rd party apps

Full Disk Encryption

Simple key mgt. and compliance reporting, using native tech on Win and Mac

Security for Virtual Environments and Security for AWS

Optimized scanning and improved performance for physical, virtual and cloud workloads

Security for Containers

Security built for containers and Linux workloads in hybrid and multi-cloud environments

Automated Behavior CORE

Anti-exploit

Detects exploit techniques, stops 0-day exploits

Behaviour monitoring

0-Trust process monitor, automatically blocks malicious processes

Network Attack Defense

Blocks network-based attacks such as Brute Force or Password Stealers

Firewall

Two-way host firewall protecting endpoints anywhere

Ransomware Mitigation

Restore files after ransomware attacks from secure copies

ADD-ON

Email Security

Block advanced email ransomware, impersonation scams, phishing, spam

Prevention, Monitoring, and Response

ADD-ON

Advanced Threat Security Fileless Attack

Defense command lines in memory blocking fileless or script-based attacks

HyperDetect Machine Learning

Special tunable ML models that prevent advanced ransomware, fileless, and 0-day threats

Cloud Sandbox Analyzer

Auto and manual analysis of potential threats, verdict and behavior insights

Endpoint Detection and Response Attack Visualization and Forensics

Understand how attacks unfolded, support compliance

Early breach detection

Prioritized incident detections with rich MITRE tags

Guided investigation and response options

Suggested actions and responses such as isolate, or remote shell

Extended Detection and Response Productivity

Securely collect and pre-process data about applications, traffic and content

Cloud

Collects and processes information about configuration changes and user activity

Identity

The sensors collect and process user sign-in activity, configuration changes and other activity

Network

Collects and processes network traffic across the environment

Managed Detection and Response

Service ADD-ON

MDR Foundations for MSP

Proactive Protection and response – including threat-intel driven hunts by our team of experts across your entire customer base – to ensure organizations are cyber resilient

Robust Response

We provide incident and breach response that supports your team in all scenarios, and we automatically take action to stop any malicious or anomalous activity on a customer's behalf. You get the ability to tune pre-approved actions in our MDR portal to match your risk appetite

Team of Experts

Always ready, highly skilled security analysts, sourced from the U.S. Air Force, U.S. Navy, British Intelligence and NSA, partner with you as the frontline of your cyber defenses

SwiftTech Solutions is a Managed Services Provider working with 1000s of businesses and providers for over 20 years. In order to fulfill security requirements related to endpoint security, regulatory compliance requirements, and ongoing industry security concerns external partnerships are critical to service delivery. We have partnered with Bitdefender as our AI Endpoint Protection tool of choice.

Bitdefender is a cybersecurity leader delivering best-in-class threat prevention, detection, and response solutions worldwide. Guardian over millions of consumer, business, and government environments, Bitdefender is one of the industry's most trusted experts for eliminating threats, protecting privacy and data, and enabling cyber resilience. With deep investments in research and development, Bitdefender Labs discovers over 400 new threats each minute and validates around 40 billion daily threat queries. The company has pioneered breakthrough innovations in antimalware, IoT security, behavioral analytics, and artificial intelligence, and its technology is licensed by more than 150 of the world's most recognized technology brands. Launched in 2001, Bitdefender has customers in 170+ countries with offices around the world.
